

Medication Checklist

- What is the medication for and how long should I take it?
- Does it replace or conflict with anything I'm currently taking?
- When do I take the medication, with or without food?
- What are the possible side effects? Which are most common?
- Could I have an allergic reaction, what would the symptoms be?
- Is this a new drug?
- Can I drink while taking this medication?
- Is there a generic formula for this drug that will be just as effective?
